

HOW TO USE THIS MANUAL

This manual is organized first by Times Microwave Cable groups and second by the types of RFI connectors available for those groups. The connectors are divided into subgroups by type.

Each connector listing contains the RFI part number, the description and the materials used for each connector. The materials listing consists of the body, shell, pin/contact, and dielectric.

The Cable Number Locator on the next page is supplied for easy cross-referencing by cable number to page number.

Example:

You need to know if RFI has a N Male Clamp Solder Plug for Times Microwave FM-62.

Refer to the following table and locate Times Microwave FM-62. Go to page 11. Under the heading Times Microwave FM-62 you will find RFN-1904-1N and RFN-1904-1S.

From the description and the materials information you are able to determine if one of these connectors works for your application. The legend at the top of page three explains the material codes used in this manual.

Part numbers with an (*) are special order only. The (*) indicate the pin to be solder only.** If you have special requirements, please contact RF Industries' sales department for assistance.

The information found in this guide was compiled using specifications that were current at the time of compilation. Please note that manufacturer's specifications are subject to change without notice. We therefore suggest that after using this guide to make your initial connector selections, you should obtain the latest product specifications from this cable manufacturer and RF Industries.
