## HOW TO USE THIS MANUAL

This manual is organized first by Andrew Cinta™ Cable groups and then by the types of RFI connectors available for each group. The connector lists are divided into subgroups by interface type.

Each connector listing contains the RFI part number, the description and the materials used for each connector. The materials listings consist of the body, shell, pin/contact, and dielectric.

The Cable Number Locator below is supplied for easy cross-referencing by cable part number to page number.

### *Example:*

*You need to know if RFI has an N Male Clamp Solder Plug for CNT-400.*

*Refer to the table below for CNT-400. Go to page 10. Under the heading for CNT-400, CNT-400-DB, CNT-400-FR you will find RFN-1006-3I and RFN-1006-I.*

From the description and the materials information you are able to determine if one of these connectors works for your application. The legend on page two explains the material codes used in this manual.

**Part numbers with an (\*) are special order only.** If you have special requirements, please contact RF Industries' sales department for assistance.
